Some facts
about us ...

School of Energy and Transportation

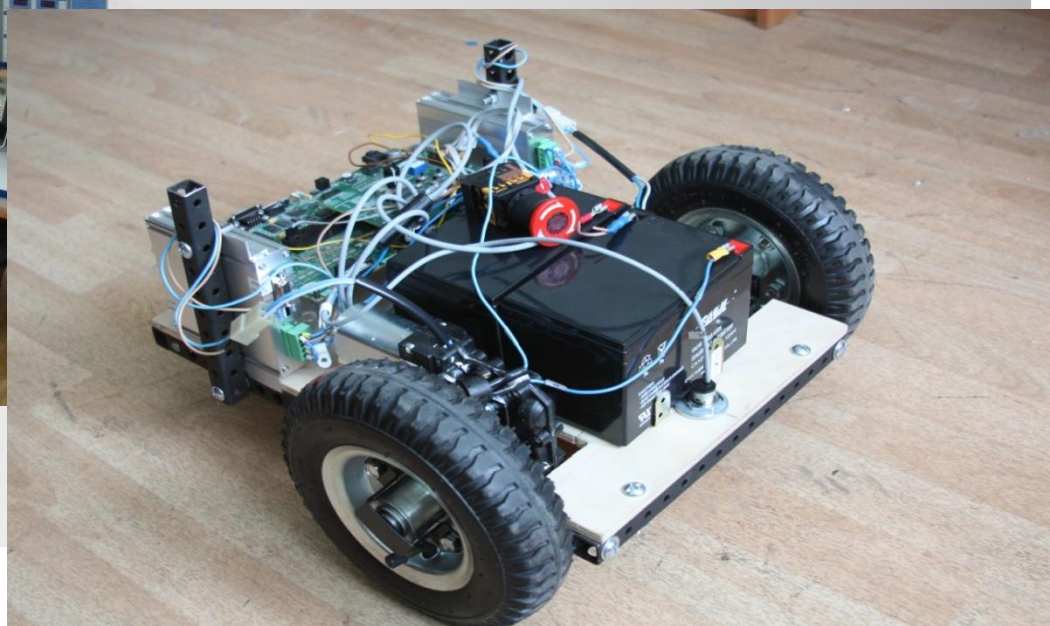

School of Energy and Transportation

- offers various academic opportunities in energy and transportation studies.
- graduates of the School have perfect employment opportunities in the field of natural gas transportation, gas and oil processing, electrical and thermal power generation and distribution
- involved in a wide range of research projects, dedicated to development of renewable energy sources

School of Electrical and Mechanical Engineering

School of Electrical and Mechanical Engineering

It was founded in 2013. The School was made up of two schools: the School of Electronics and Instrumentation and the School of Mechanical Engineering.

The institute prepares specialists for defence industry and provides training in mechanical engineering.

School of Applied Information Technology and Communication

School of Applied Information Technology and Communication

It was founded in 2008 on the basis of the International Training Centre of computer technologies (founded in 1998).

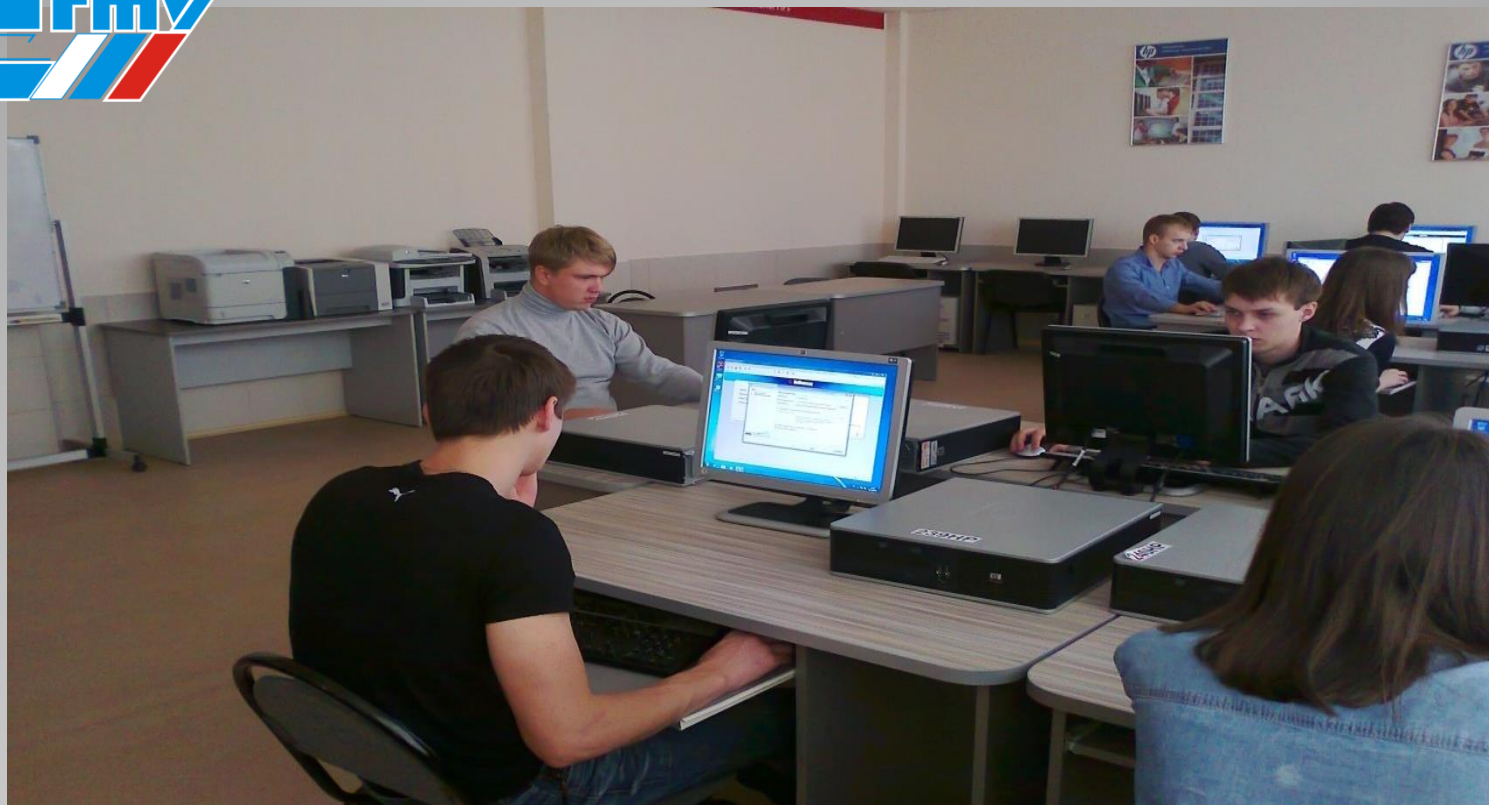

The hallmark of training at this School is a useful analysis of computer technologies, which are very necessary in business today.

School of Applied Information Technology and Communication

This school is the youngest among the rest. It was founded in 2008 on the basis of the International Training Centre of computer technologies (founded in 1998).

The hallmark of training at this faculty is a useful analysis of computer technologies, which are very necessary in business today.

School of Applied Information Technology and Communication is a unique school. Their graduates receive not only the Diplomas of Higher Education of the Russian Federation, but also International credentials.

School of Physics and Technology

Graduates produced by this School are adapted to a range of areas that extend to scientific and engineering organizations, including spheres of industry, medicine, education and banking. The School widely cooperates with educational structures and other organizations, including the cooperation of academic staff with foreign companies.

School of Urbanistics, Civil Engineering and Architecture

Founded in 2009, the School prepares experts able to create and modify human environments. Graduates of the School go on to a career in the sphere of civil and industrial engineering, road and bridge construction.

School of Social and Industrial Management

It comprises 3 schools and one centre: School of Economics and Management, School of Ecology and Service, School of Humanities, Arts and Social Sciences and Centre of postsecondary professional education.

Institute of Business Development and Strategies

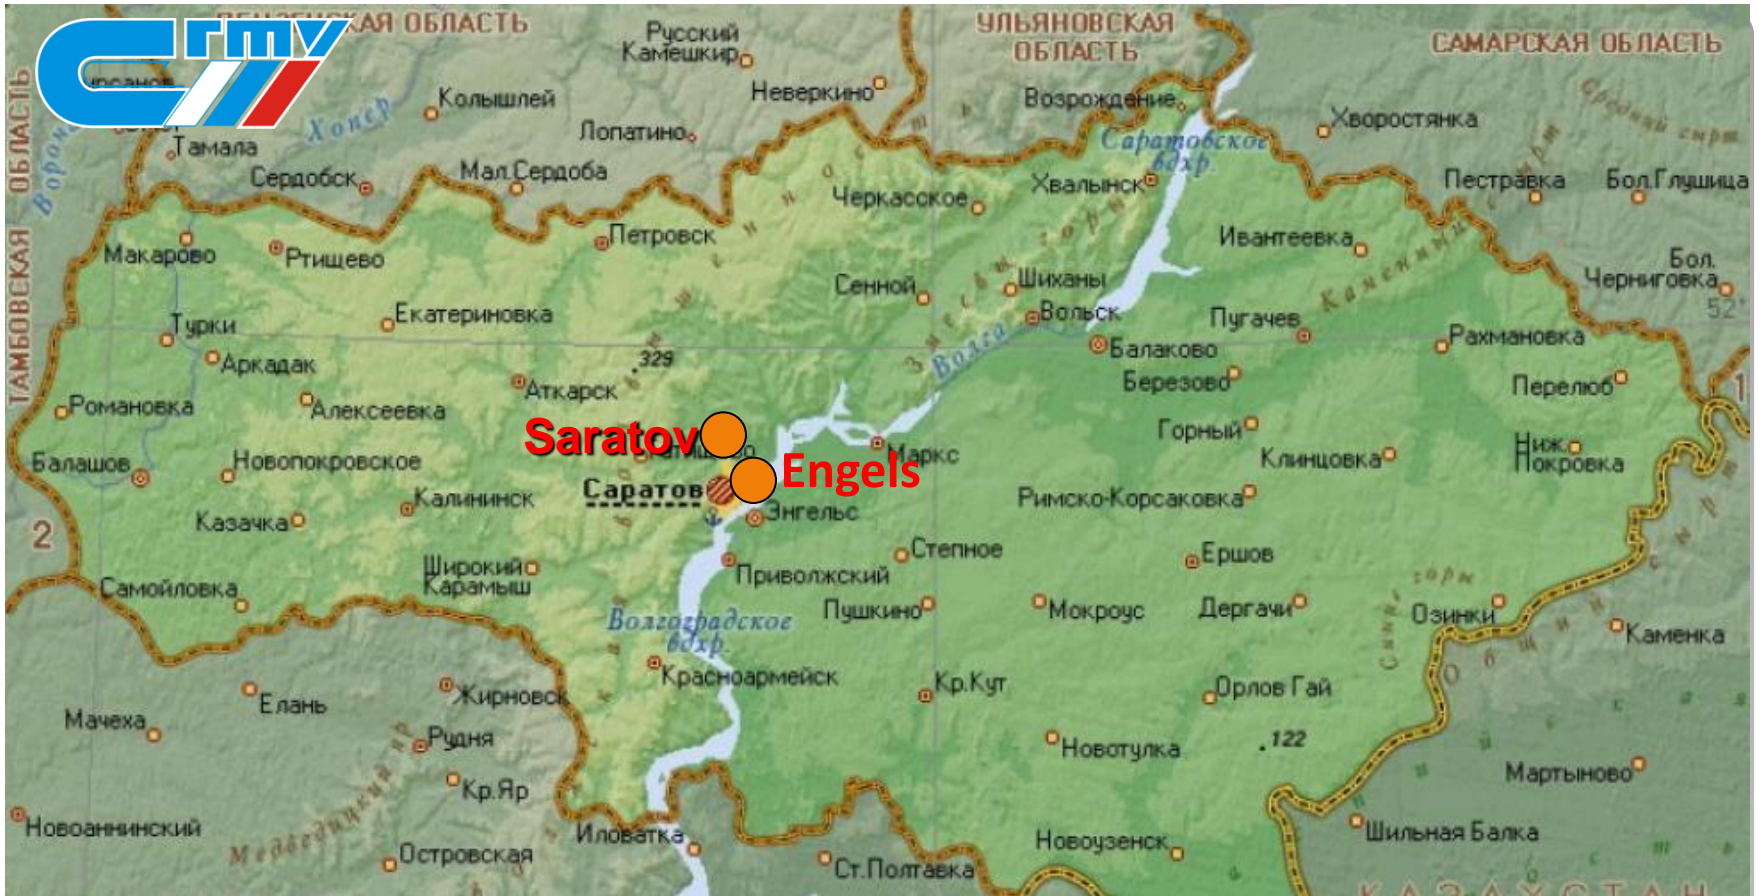

Institute of Business Development and Strategies

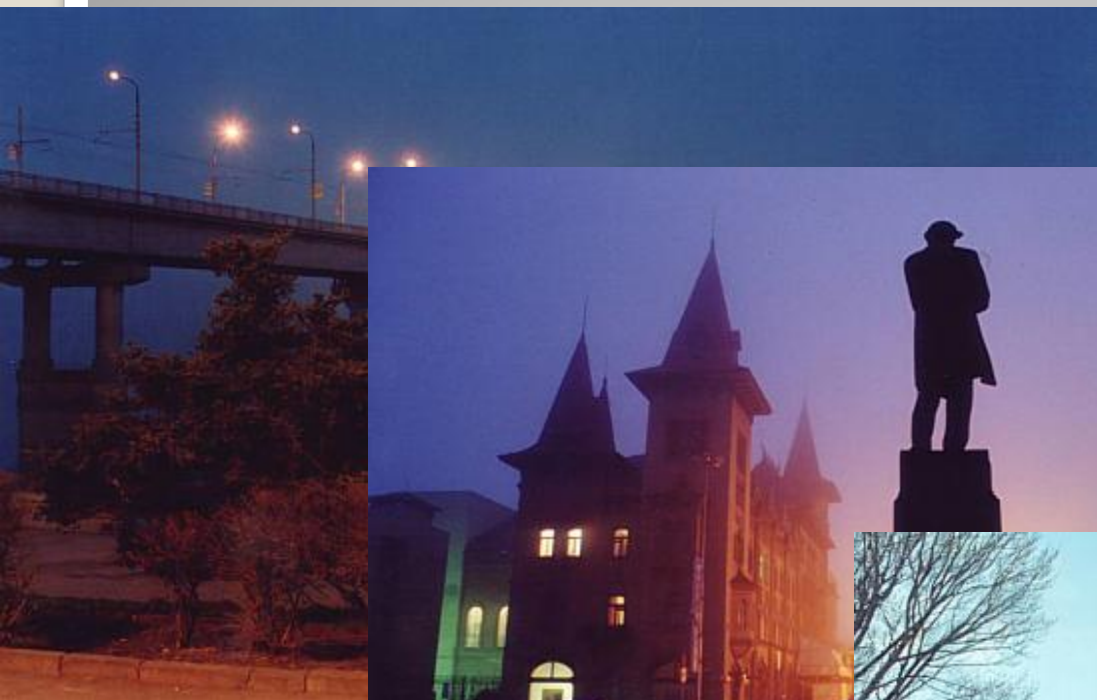

Since 1990 the School trains specialists in the sphere of entrepreneurship. This is the only place in Saratov which objective is to teach business. It consists of the Higher School, the School of Business and Business College.

Moreover, the State Technical University includes the Institute of Technology, situated in Engels (in a small town on the other bank of the Volga river).
